SKILLS

Cloud & AI Architecture

AWS · Azure · Landing Zones ·
CCoE · Control Tower · Bedrock.
Azure Foundry.

Platform Engineering

Kubernetes (EKS/AKS) · Container
Platforms · Docker · ECR · AI
Workloads

DevOps & Automation

Terraform · CloudFormation · CI/CD
(Bamboo, Jenkins, Git) · Developer
Self-Service

DevSecOps & Governance

IAM · Security Hub · GuardDuty ·
Compliance Automation ·
WAF/Shield · Imperva WAF

FinOps & Operations

QuickSight · Cost Reporting ·
CloudWatch · OpenSearch ·
Prometheus · Grafana

Programming

Python · Bash

CERTIFICATIONS

AWS Certified Solutions
Architect - Professional

AI-Singapore

Certified Kubernetes
Administrator (CKA)

Google Cloud Professional
Architect

Red Hat Certified Engineer
(RHCE)

SUMMARY

Lead Cloud & DevOps Architect with 18+ years of experience designing and delivering enterprise-scale platforms across AWS and Azure, with strong focus on cloud-native architecture, DevSecOps, GenAI enablement, and multi-cloud governance. Proven track record of building secure landing zones, modernizing CI/CD platforms, enabling Kubernetes/EKS workloads, and driving FinOps automation and operational excellence. Recognized for aligning cloud platform strategy with business outcomes and improving reliability, security, cost visibility, and engineering productivity.

EXPERIENCE

Lead DevOps & Cloud Engineer

07/2021 - Present

Singtel

Singapore

Leading cloud platform engineering, DevSecOps modernization, GenAI enablement and multi-cloud governance initiatives across enterprise AWS and Azure environments.

Leadership & Platform Transformation

- Provide technical leadership and architecture guidance to cloud, DevOps, security, and application teams while driving large-scale enterprise cloud and platform transformation initiatives across multiple business units.
- Lead **cloud platform engineering initiatives focused on automation, governance, reliability, security**, and developer self-service across AWS and Azure environments.

AWS & Azure Landing Zone Architecture

- Designed and implemented enterprise-scale **AWS and Azure landing zones** supporting secure multi-account adoption, standardized onboarding, governance guardrails, and scalable cloud operating models.
- Established AWS governance patterns covering **OU/account baselines, IAM standards, network segmentation, security monitoring, compliance automation, and cloud account lifecycle management**.
- Architected secure cloud environments aligned with enterprise security, FinOps, and operational governance requirements.

DevSecOps Platform Modernization

- Modernized CI/CD delivery by embedding automated security scanning, quality gates, compliance checks, and deployment automation into **Bamboo, Jenkins, Git, Terraform, and CloudFormation** pipelines.
- Strengthened application and cloud security using **AWS Security Hub, GuardDuty, WAF, Shield, Imperva, IAM governance**, and automated remediation patterns.
- Designed automated **Imperva WAF onboarding framework using Infrastructure-as-Code**, enabling standardized application protection and scalable security policy deployment
- Designed automated **CrowdStrike, Prisma and Tenable security solution onboarding framework using Infra-as-Code for AWS & Azure** to enable standardized and monthly reporting

Infrastructure as Code & Automation

- Built reusable **Terraform modules and CloudFormation templates** enabling self-service infrastructure, repeatable deployments, and consistent infrastructure standards across application teams.
- Standardized Infrastructure as Code practices to improve deployment reliability, reduce manual effort, and ensure infrastructure changes are version-controlled, auditable, and secure.

Container Platform & EKS Enablement

- Architected, deployed, and operated **Amazon EKS platforms supporting production-grade, cloud-native, and AI/LLM workloads with high availability**, scalability, and operational resilience with re-usable infra as code.
- Defined Kubernetes platform standards covering networking, ingress, RBAC, secrets management, autoscaling, monitoring, workload deployment, and operational support.

Multi-Cloud Governance, FinOps & Operations

- Drove **multi-cloud governance alignment across AWS and Azure**, including IAM governance, security monitoring, **backup and recovery considerations, cost visibility**, and operational controls.
- Built FinOps dashboards and cost reporting using **Amazon QuickSight** to improve cloud cost visibility, tagging compliance, budgeting, and optimization across environments.

GenAI & Cloud-Native Automation

- Designed and deployed GenAI-enabled solutions using **Amazon Bedrock and Azure OpenAI/Azure Foundry**, integrating LLM capabilities into enterprise workflows and cloud-native automation use cases.
- Integrated **AI services into platform operations** to improve automation, decision-making, operational visibility, and engineering productivity.

Consultant - Cloud & Infrastructure Architect 01/2012 - 07/2021
HCL Singapore Ltd

- Led a team of 50+ engineers delivering 24/7 L3/L4 support for large-scale enterprise infrastructure across AWS, Azure, and on-prem environments.
- Managed infrastructure footprint of 15K+ Linux/Unix servers and 10K+ cloud instances across multi-cloud environments.
- Designed and executed cloud migration strategies including datacenter consolidation and hybrid cloud adoption.
- Implemented automation frameworks using Ansible, Chef, and Jenkins to reduce manual effort and improve operational efficiency.
- Architected secure and scalable cloud environments including VPC design, IAM governance, and compliance controls.
- Collaborated with stakeholders to optimize infrastructure costs and improve service reliability.

Lead & Subject Matter Expert - Unix/Cloud 02/2009 - 01/2012
Accenture Services Ltd

- Led Unix and storage teams supporting enterprise infrastructure across multiple global datacentres for a UK-based construction company.
- Delivered automation solutions to improve monitoring, backup, and system performance.
- Ensured high availability through clustering and disaster recovery solutions.

System Administrator - Linux & Cloud 07/2007 - 02/2009
HCL Comnet Ltd

- Managed Linux-based hosting and enterprise solutioning in Govt DataCentre.
- Supported deployment, troubleshooting, and system reliability improvements.

System Administrator - Linux & AIX 08/2006 - 07/2007
Patni Computer Systems Ltd

- Administered enterprise infrastructure and Data Centre operations for Airtel DataCenter.
- Managed system security, patching, and performance optimization for Data Centre.
