

Subhash Jugran

Lead Cloud & DevOps Engineer | DevOps, Platform Engineering & GenAI Enablement

Singapore | +65 96511850 | subhashjugran@gmail.com

<https://www.linkedin.com/in/subhashjugran/>

PROFESSIONAL SUMMARY

Lead Cloud & DevOps Architect with 18+ years of experience designing and delivering enterprise-scale platforms across AWS and Azure, with a strong focus on GenAI enablement and cloud-native architecture. Proven track record of building secure, scalable landing zones, accelerating delivery through DevSecOps, and integrating LLM-powered solutions into enterprise systems.

Designing platforms that support GenAI workloads, Kubernetes-based AI services, and automation using Amazon Bedrock. Recognized for driving cloud transformation, improving operational efficiency, and aligning platform strategy with business outcomes.

CORE EXPERTISE

- Cloud & AI Architecture: AWS, Azure, OpenShift, Landing Zones, CCoE
- GenAI & AI Platforms: Amazon Bedrock, Azure OpenAI, SageMaker, LLM Integration
- Platform Engineering: Kubernetes (EKS/AKS), Container Platforms, AI Workloads
- DevOps & Automation: Terraform, CloudFormation, CI/CD (Bamboo, Jenkins, Git)
- DevSecOps: IAM, Security Hub, GuardDuty, Compliance Automation
- Observability: CloudWatch, Prometheus, Grafana, ELK, OpenSearch
- Programming: Python, Bash

PROFESSIONAL EXPERIENCE

Lead DevOps & Cloud Engineer

Singtel, Singapore | Jul 2021 – Present

Leading cloud platform engineering, DevSecOps, and GenAI enablement initiatives across AWS and Azure environments.

- Designed and implemented enterprise-scale AWS and Azure landing zones supporting multi-account environments, improving onboarding speed and governance
 - Built reusable Terraform modules enabling self-service infrastructure for multiple application teams, improving consistency and deployment efficiency
 - Architected and deployed Kubernetes (EKS) platforms supporting production-grade workloads with high availability and scalability
 - Designed and deployed GenAI-enabled solutions using Amazon Bedrock, enabling integration of LLM capabilities into enterprise workflows
 - Designed Kubernetes (EKS) platforms supporting production-grade and AI/LLM workloads with autoscaling and high availability
 - Integrated AI services into cloud-native architectures to automate operations and enhance decision-making capabilities along with FinOps Dashboards using Quick-Sight.
 - Implemented end-to-end DevSecOps pipelines integrating security scanning, compliance checks, and automated deployments
 - Strengthened cloud security posture using Security Hub, GuardDuty, WAF, Shield, and enterprise monitoring tools like Imperva
 - Established centralized observability frameworks using CloudWatch, ELK and monitoring tools to improve incident detection and response
-

Consultant – Cloud & Infrastructure Architect

HCL Singapore Ltd | Jan 2012 – Jul 2021

- Led a team of 50+ engineers delivering 24/7 L3/L4 support for large-scale enterprise infrastructure across AWS, Azure, and on-prem environments
 - Managed infrastructure footprint of 15K+ Linux/Unix servers and 10K+ cloud instances across multi-cloud environments
 - Designed and executed cloud migration strategies including datacenter consolidation and hybrid cloud adoption
 - Implemented automation frameworks using Ansible, Chef, and Jenkins to reduce manual effort and improve operational efficiency
 - Architected secure and scalable cloud environments including VPC design, IAM governance, and compliance controls
 - Collaborated with stakeholders to optimize infrastructure costs and improve service reliability
-

Lead & Subject Matter Expert – Unix/Cloud

Accenture Services Ltd | Feb 2009 – Jan 2012

- Led Unix and storage teams supporting enterprise infrastructure across multiple Global *datacentres for UK Based Construction* Company.
 - Delivered automation solutions to improve monitoring, backup, and system performance
 - Ensured high availability through clustering and disaster recovery solutions
-

System Administrator – Linux & Cloud

HCL Comnet Ltd | Jul 2007 – Feb 2009

- Managed Linux-based hosting and enterprise solutioning in *Govt DataCentre*
 - Supported deployment, troubleshooting, and system reliability improvements
-

System Administrator – Linux & AIX

Patni Computer Systems Ltd | Aug 2006 – Jul 2007

- Administered enterprise infrastructure and Data Centre operations for *Airtel DataCenter*
 - Managed system security, patching, and performance optimization for Data Centre
-

TRAINING/CERTIFICATE PROGRAM

- Agentic AI on AWS from BeSA
 - Model Context Protocol: Foundation & Advanced Topics from Anthropic
 - AWS Cloud Quest: Generative AI Practitioner
 - Foundations in AI from AI Singapore
-

PROFESSIONAL CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
 - Microsoft Azure Architect – Expert
 - AI Foundation from AI-Singapore
 - Certified Kubernetes Administrator (CKA)
 - Google Cloud Professional Architect
 - Red Hat Certified Engineer (RHCE)
-

EDUCATION

- Master of Computer Applications (MCA)
 - Bachelor of Computer Applications (BCA)
-
